

# Car Snooker

This isn't just a game of luck. This is a game of strategy. Not only do you have to spot cars in the right colour and the right order, but if you're clever about it, you could pick up lots more points than your opponent. Cues ready?

## How it works

1. Use the score sheet below to keep track. One other person (who isn't playing) has to be time keeper
2. You take it in turns to go - you get one minute if you're on a motorway, two if you're not
3. Each time you spot a car, point it out to everyone then mark your initial next to that colour ball on your score sheet
4. First you have to spot a red. Then one of the other colours. It's up to you what colour you choose, but look at the points you get. If you've got time, it might be worth holding out for a pink
5. Then you pot a red again, then a colour. Repeat this until you've spotted all 15 reds
6. After the 15th red, you then have to spot all the coloured balls in the right order - yellow, green, brown, blue, pink, then the black
7. The game is over when one of the players spots their final black car. Hand over your score sheet to the timekeeper who adds up all the points
8. The winner is the player with the most points
